

Serial No. 10/657,705

Election dated July 19, 2005

In Reply of Election/Restriction dated July 11, 2005

**Amendment to the Specification:**

On page 2, under "Field of the Invention" please delete the paragraph on page 1, lines 6-13 beginning "The present invention relates" and insert the following new paragraph:

The present invention relates, in general, to a sphygmomanometer cuff and, more particularly, to a sphygmomanometer cuff having **two bladders, hereafter referred to as** a double bladder, in which a small bladder is provided in addition to a large bladder to allow relatively large pulse waves to pass through the small bladder, thereby being capable of precisely and finely measuring a systolic blood pressure and a diastolic blood pressure through the pulse waves transmitted from the artery of the human body.
